EDUCATIONS

GLA University | Mathura, Uttar Pradesh
B.Tech in Computer Science & Engineering

Aug 2023 - May 2027
CGPA : 8.55

WORK EXPERIENCES

AI Trainer (Competitive Coding)

Jun 2026 - Present
Remote

micro1

- Engineered and rigorously tested high-complexity C++ competitive programming datasets (Codeforces 1800+ level) to evaluate and benchmark frontier LLMs, ensuring highly efficient and memory-safe code generation.
- Developed automated Python testing scripts and validation suites using Testlib to catch logical edge cases in AI model outputs, running continuous execution pipelines within isolated Linux/Docker environments.

Technologies / Skills Used : C++, Algorithms, Data Structures, Competitive Programming, Docker, Git, LLM Evaluation, Reinforcement Learning (RLHF)

AWARDS & ACHIEVEMENTS

- Codeforces:** Master (Max Rating: 2221)
- LeetCode:** Guardian (Max Rating: 2614)
- Global Rank 10** (India Rank 1) – Codeforces Educational Round 185
- ICPC Asia West Regionalist** 2025
- Global Rank 179** – Yandex Cup 2025, **Global Rank 1151** – Meta Hacker Cup 2025
- Solved 2000+** problems across LeetCode, Codeforces, and other platforms
- Finalist** – Crack-a-Code 3.0 (Nagarro), Code for Bharat 2.0
- Open Source Contributor** – Social Summer of Code 2025

SKILLS

Programming Languages : C++, Java, Python, SQL, JavaScript

Frameworks & Libraries : Node.js, Express, Tensorflow, RestAPI

Course Skills : Data Structures & Algorithms, Operating Systems, Memory Management, Multithreading, Object-Oriented Programming (OOP), Computer Networks

Tools & Platforms : Linux, Docker, AWS, GitHub, Git

Databases : PostgreSQL, MySQL, SQLite

PROJECTS

MyCodingBuddy – Competitive Programming Platform | 🌐 Website

Jan 2026 - Present

- Designed and implemented a high-performance distributed judging system using **Redis-backed queues** to schedule and execute code submissions with sub-second execution latency.
- Engineered resource-constrained code execution environments to enforce strict execution limits (Time Limit / Memory Limit), handling **300+ concurrent** multi-language binaries safely.
- Built and optimized backend APIs using TypeScript and Node.js, ensuring robust integration, secure JWT-based access controls, and highly scalable data flows.

Technologies / Tools Used : TypeScript, Node.js, React, PostgreSQL, Prisma, Redis, Tailwind CSS, Express

Heal.AI – Healthcare Web Application | 🌐 Website

Apr 2025 - Present

- Built and deployed** a healthcare application enabling symptom-based assistance and patient interaction workflows.
- Designed** RESTful APIs and managed application state in React to ensure efficient data flow and responsive user experience.

Technologies / Tools Used : Node.js, React, MongoDB, Express, Tailwind CSS

Scalable Predictive Analytics Platform | 🌐 Github

Apr 2025 - May 2025

- Architected a low-latency predictive data analytics platform using Python and Node.js for high-throughput stream processing and automated validation.
- Developed server-side caching mechanisms and optimized backend data-handling algorithms, reducing system response times and preventing pipeline degradation under heavy loads.

Technologies / Tools Used : Python, Node.js, SQL, Render, React, Express, Tailwind CSS

LEADERSHIP & COLLABORATION

- Mentored 1,000+** competitive programmers on the Repovise platform through post-contest discussions, explaining problem-solving strategies and **improving participants' analytical thinking**.
